SPREAD FERTILIZER

Fertilizing is critical to keeping your lawn green, thick and healthy.

Apply one of Central Sod's turf fertilizers to keep your lawn well fed

WEED CONTROL*

Broadleaf weeds like clover and dandelions might show up in May. This is a good time of year to spray them with a selective herbicide that will not harm your grass.

*only if needed / weeds present

WATERING •

Depending on the summer. you might or might not need to water occasionally. It is better to water heavily and infrequently as opposed to frequent light waterings.

MOWING 🔴

Mow cool season grasses to a height of 2.5" to 3.5" inches as needed. Make sure to sharpen mower blades.

attacks turfgrass. *only needed if nights are consistently hot and humid -

APPLY FUNGICIDE*

When nights are above 70

recommend applying a liquid

brown patch. Brown patch is

fungicide once a month to

degrees and humid, we

protect your lawn from

an airborn fungus that

look for patchy brown areas

GRUB CONTROL*

Grubs are most easily killed in July when they are still eggs. Apply a granular grub control product that will protect your lawn all year.

*only apply if grubs have been a problem previously

OVERSEED

Fall is the best time to overseed cool season turfgrass. Make sure to use quality seed! We sell the same seed we grow our sod with so you know it will be a perfect match!

WHEN TO TEST YOUR SOIL

- New Lawns: Test after grading, but before seeding.
- Vegetable Gardens: Test every 3 years.
- Established Lawns & Garden Beds: Every 3-4 years.
- It's hest to test in the fall.
- Pick up your SoilKit at Central Sod or order online!

We recommend not bagging your clippings unless they start to clump, in which case they need to be bagged or raked.
